

## **SUPPLEMENTAL LIGHTING RULES FOR NIGHT RACES**

Cars entered in a night race must comply with the following lighting requirements:

- 1. Headlights and tail lights are required. Two primary headlights and two tail lights must be as bright as the original factory lights for the car model. The original headlights and tail lights for the car model may be used and no additional lights are required beyond these.*
- 2 Primary headlights must be located on the front of the car, above the bumper and below hood level, and outside of the inner edge of the front tire. Up to two additional driving lights may be located between the primary headlights. Additional lights may not be brighter than the primary headlights. Roof lights are not allowed.*
- 3 Tail lights must be located either as part of the light complex that includes the two primary brake lights or near those brake lights, outside of the inner edge of the rear tire.*
- 4 Excessive glare in the mirrors from overly bright and poorly aimed lights of cars approaching from behind is a significant problem, and all lighting must be adjusted to avoid this. However, adequate headlights are necessary to be able to see the track surface ahead, and tail lights are needed to be seen by cars behind.*
